Step 1 Prep Nails

Perform a dry manicure. Shape nails with a file and remove cuticle from nail plate with a cuticle pusher. Remove shine from natural nail with a 180 grit white padded gel file.

Apply a thin coat of Powerbond prior to applying Just Gel Polish Base Coat.

Step 2 Just Gel Polish Base Coat

Apply a thin coat of Just Gel Polish Base Coat. Make sure to keep base coat off the cuticle

Cure: 30 seconds in LED lamp or 1 minute in a UV lamp.

NOTE: Base Coat, Gel Polish, and Top Coat are cured separately. To ensure proper curing, thumb application should be done separately.

Step 3 Just Gel Polish Color

Make sure to mix the color pigment in the bottle by rolling the Just Gel polish bottles – do not shake. Apply two thin coats of Just Gel Polish. Note to cure each coat separately. Make sure to keep Gel Polish off the cuticle.

Cure: 30 seconds in a LED lamp or 2-3 minute in a UV lamp.

Step 4 Just Gel Polish Top Coat

Apply a thin coat of Just Gel Polish Top Coat. Make sure to keep Top Coat off the cuticle and encase the tip edge to ensure long wear.

Cure: 30 seconds in a LED lamp or 2 minute in a UV lamp.

Step 5 Cleanse

Place 2-3 drops on edge of a nail wipe with Just Gel cleanser. Cleanse each finger with firm pressure to remove gel residue. To ensure proper cleansing, use a clean side or part of a wipe for each finger.

KARDASHIAN

SUN KISSED

What is Kardashian Sun Kissed?

Kardashian Sun Kissed is a three-step, sunless tanning system designed to deliver a healthier looking, bronzed complexion. The products were designed by Kim, Kourtney and Khloe Kardashian to bring high quality tanning products to their fans. The proprietary system starts by exfoliating and priming, leads into sunless tanning, and finally extends the tan with nutrients and added bronzers.

What we love about it.

The "Pure Sunshine" fragrance has top notes of Citrus Berry combined with Musk and Light Woods to keep a fresh and clean scent.

KARDASHIAN

SUN KISSED

“When expanding our brand into the beauty industry, we found it's what is in the bottle that matters - ingredients are the most important part,” said the Kardashians. “We have all tried endless amounts of beauty products, sunless tanning systems included, and we really wanted to create an easy way to sport a faux glow all year long. We think our fans will love Kardashian Sun Kissed results as much as we do.”

MOISTURISATION AND NOURISHMENT - FOR DRY & ARID SKIN

VAGHEGGI

Dry and arid skin

Water is the most valuable asset for life. "Quenching" the skin and keeping it constantly hydrated is the most important step in cosmetic treatment of the skin in general, above for those skins that, always or at particular moments in life, suffer from dryness and aridity. It is not enough to "quench" the tissue from the outside and restore the barrier function of the corneal layer to rebalance the natural flow of water vapour towards the exterior, we must help these skin types to naturally hold onto the water that often decreases due to less than optimum environmental conditions such as the cold, low ambient humidity or even dehydrating chemical agents.

Active Principles

Althoea officinalis (highly mucilaginous): Known as "marshmallow" prevents the natural deterioration of the hyaluronic acid in the skin.

HYDRAPLUS COMPLEX:

Hyaluronic Acid: A super-hydrating molecule and matrix of connective tissue, is responsible for maintaining levels of moisture, turgor and elasticity, acting as a binding agent.

Ximerynic Acid from Ximena Africana: Called the "sea lemon" from the South African savannah, helps to heal scars, moisturise and protect blood vessels.

Natural biosaccharide: A polysaccharide blend of galacturonic, fucose and galactose acid, binds the surface water to moisturise and protect.

ACTIVE INGREDIENTS FOR REHYDRA INTENSIVE MOISTURISING CREAM:

Extract of Myrothamnus flabellifolia: Called the Resurrection Plant, which survives in desert conditions and extract of Tamarindus Indica, called the Indian date, rich in sugars, vitamins, minerals (in particular iron, potassium and calcium), pectin and organic acids (citric, tartaric and malic), they hold onto water in the skin, plumping the tissue.

BALANCE

BALANCING FOR BLEMISHED - IMPURE SKINS

VAGHEGGI

Impure, mixed skins with imperfections

Excessive secretion of sebum may be stimulated by different factors, which may be external (pollution, temperature, stress) or internal (hormonal imbalance). 85% of adolescents have oily skin with imperfections caused by hormonal activity that stimulates sebum secretion. This condition also affects a growing number of adults for reasons yet to be confirmed: the hypothesis is that the stress of modern life and pollution modifies the hormonal balance and therefore sebum secretion. The formation process of comedones is identical in youngsters and adults, but the former mainly suffer in the T-zone while adults tend to be more afflicted on the lower part of their faces.

Active Principles

Cucurbita pepo (pumpkin): Which provides proteolytic enzymes for an effective scrub action and cell renewal stimulation.

Avocado: A Mexican fruit that gives an active ingredient (butyl avocadoate) for preventing activity by the enzyme 5-alfa, thought to be responsible for the increase in sebum secretion.

Ananas Sativus (Pineapple): A plant native to South America that belongs to the Bromellaceae family. Its high bromelain content (a blend of proteolytic enzymes and AHAs, vitamins from the A, B, and C groups and minerals) helps the keratolytic action: it digests surface proteins (keratin) to combat skin thickening. It also has an anti-bloating effect thanks to its capacity to digest fibrin.

Salk alba: A plant that grows throughout Europe and contains high levels of phenolic glycosides including salicine, the natural forerunner to salicylic acid and flavonoids like Isoquercitrin and tannins. It has an anti-inflammatory, soothing and exfoliating action.

Melaleuca alternifolia: Distillation of Tea Tree oil (In turn extracted from Melaleuca) gives the molecule terpinol, a very strong antiseptic with a wide-ranging sphere of action on various strains of bacteria, combined with excellent anti-inflammatory properties.

Lavandula angustifolia: An essential oil with a purifying effect.

Absorbent micro-powder: Mineral particles that absorb excess sebum.

DEDICATED TO SENSITIVE & INTOLERANT SKIN

VAGHEGGI

For sensitive and intolerant skin

Over 70% of the female population aged between 18 and 65 suffers from problems of very sensitive and intolerant skin. The cause is genetic, but also the consequence of various internal and external factors (aggression caused by the environment and lifestyle). The skin is subject to irritation and allergies, it presents redness, rashes, blemishes, flaking and in some cases may even crack. The sufferer often complains of unpleasant sensations, like itching or stinging, annoying sensations or burning. The most typical consequences are loss of elasticity and softness, early ageing and the appearance of rashes, redness, couperose and rosacea.

Active Principles

Camellia sinensis: Known as green tea or King of Asia, grown in east and south-east Asia and *Chrysanthellum Indicum*, known as Golden chamomile or African Savannah Queen, a herb from the east sub-tropical region of Africa combine in a synergy that has an anti-bloating, soothing, draining, anti-oxidant and vein protecting effect with a reduction in vein permeability and an increase in capillary resistance.

Organic extract of Bilberry: Rich in anthocyanins that have a positive effect on vein walls, helping to normalise their resistance (permeability) and elasticity.

Phytosterols and Calendula, Canola and Jojoba oils: Have eudermic, epithelising, soothing, anti-oxidant, scar-healing and cooling effects.

Phytosome 18-Glycyrrhetic Acid: Extracted from liquorice root. This has been recognised as highly effective against free radicals, with effective soothing and scar healing properties that calm irritation and leave the zone treated feeling pleasantly relieved. Special phytosome preparation (a complex of glycyrrhetic acid and soy phospholipids) creates a biologically active structure on the epidermis, with a gradual effect and prolonged results over time.

Panthenol: Also called provitamin B5, has a marked humectant action (the capacity to hold onto moisture in the skin, making it soft and elastic). It also stimulates repair of tissues (dermotrophic effect): the newly formed epithelium is more resistant and the layers of the epidermis have a more compact structure.

Allantoin: Is a remarkable repair tool for the epidermis. It boosts the action of glycyrrhetic acid and has a softening, keratoplastic and smoothing effect. It calms and protects the skin. The synergy of panthenol, allantoin and vitamin E have a specific soothing action.

WHITE MOON

BRIGHTEN TO SHINE

VAGHEGGI

Uneven coloured skin that needs brightening

Daily exposure to UV rays and in general incorrect exposure to the sun, smog (with the production of free radicals that oxidise the skin), stress and also hormonal imbalance, or even the use of oral contraceptives and physiological variations linked to pregnancy leave skin less elastic and unevenly coloured over time. A radiant look is the real secret of health and therefore youthful skin. Maintaining it as long as possible helps to keep the signs of age at bay. A global action that leaves the skin radiant with even colouring.

Active Principles

Glabridine: Flavonoid, lipophilic extract from *Glycyrrhiza glabra*, which regulates working of the tyrosinase enzyme and therefore of melanin synthesis. It works on pigmentation disorders with an anti-oxidant effect that makes the skin glow.

Symphytum officinale (Consolida) Glycyrrhiza glabra (Licorice), Atractylis lappa (Bardano): Active complex of botanical molecules from the plant's rhizomes with a soothing, calming action. It repairs the skin from micro-attacks, preventing surface alterations and unwanted pigmentation.

Exfoliating synergy: Made from Malic, Tartaric, Citric, Glycolic and Lactic acid that stimulates cell renewal in a controlled manner, eliminating corneal thickening and making the tissue more radiant. It increases tissue receptivity.

Beta-glucan: Polysaccharide (sugar) extracted from yeast cell wall (*Saccaromyces cerevisiae*), delivered through innovative microsponges that guarantee its stability and allow gradual continual release in to the skin throughout the day. It stimulates the formation of collagen, increases epithelisation and has photo-protective effects against the sun's rays (UVA-UVB), preventing the formation of free radicals.

Lipophilic-delivered vitamin C: Catalyses the collagen synthesis reaction, plumping and supporting the tissue. Known for its anti-oxidant action, it protects from the damage caused by free radicals. Vitamin C also helps to lighten and brighten the face.

LIME

PURE ENERGY - FOR STRESSED SKINS

VAGHEGGI

For stressed skins

The Vitamin C Linea Lime is the ideal solution for protecting skin from attack by free radicals and consequent oxidation and for a guaranteed regenerating effect on skins stressed by different factors that would cause early ageing. Lime is a line of versatile products to be used at any time of year for both young and mature skins. It is an excellent aid before and during periods of lengthy exposure to the sun to prevent its drying effects.

Active Principles

Stabilised vitamin C: (Ascorbyl tetraisopalmitate) In a lipophilic system that protects it from deterioration, is the most stable form of vitamin C and soluble in oil. It is absorbed very rapidly by the skin and is then converted into an available form as needed. It has an anti-oxidant and brightening action. It stimulates collagen synthesis, prevents cell damage and protects DNA.

Whole juice of Calabrian Blond Oranges: Extraction of both the skin (rich in essential oils that protect the juice from oxidising and contamination by bacteria) and of the pulp (it contains pectin, a polymer that works like a natural protective capsule for the vitamin C). The whole juice guarantees high concentrations of stable vitamin C thanks to the special extraction technique used (pasteurification). This method also preserves B group vitamins, vitamin A, moisturising amino-acids and protective flavonoids.

Lime buttle and essential oil: Native to Mexico, nourishing and rich in limonene with an anti-oxidant effect, they activate micro-circulation, reduce discomfort and bring relief.

Neroli Distillate (orange blossom): It is good for toning, restoring and regenerating the skin. Ideal for dry and reactive skin.

Calendula oil: A nourishing oil ideal for dry and delicate skin. Calendula has scar-healing, epithelising and soothing properties.

Jojoba oil: Rich in natural anti-oxidants and quickly absorbed, this highly derma-refining oil protects and nourishes.

VAGHEGGI

Protect your beauty

Delay Infinity answers the dream of being able to delay the worry caused by early wrinkles. Irregularly occurring anxiety caused by bigger challenges really stress the skin of women aged between 30 and 40. This line combines the richness of plant extracts obtained with fair trade policies and the latest findings in cosmetology, "cell communication facilitators", to prevent and delay the signs of aging. The strength and purity that only nature teamed with science can give you. This is a modern approach to preventing skin aging because it tackles it in an innovative way: the active ingredients rebalance cell communication for natural skin wellbeing, meeting the needs of an ever growing number of consumers with skin situations that fall between simple problems (dry, oily, reactive skins) and the signs of aging.

Active Principles

Crocus chrysanthos: Extract of crocus or "Cream beauty" is a symbol of rejuvenation and youthfulness. The extract is obtained from the bulb of this flower and is a "biological cell communication facilitator" which solves 2 problems: it increases the production of messenger molecules and makes the fibroblast accessible to the active ingredient thanks to a domino effect.

Purple Rice (Oryza Sativa): Khao Gram variety, commonly called purple rice because it is rich in anthocyanins, which give the grains their typical purple colour. This is a special kind of rice, with strong anti-oxidant properties, considered holy in Thailand. Vagheggi has chosen to purchase this ingredient obtained from purple rice, to support, via its suppliers, the rural cooperatives and local populations that in Laos and Thailand have decided to grow this variety of rice once again.

The 5 levels of skin nourishment: Almond oil, extracted by cold pressing from the almond fruit, it is one of the oils that contains the highest percentage of unsaturated and polyunsaturated fatty acids. Jojoba oil, originating in the deserts of California and Mexico, the Jojoba seeds are cold pressed to give an oil that is a liquid non-fat wax, rich in vitamin E (tocopherol, a natural anti-oxidant), vitamin F and minerals. Macadamia oil, obtained from macadamia nuts, which grow wild in the Australian rain forests, this is a huge source of monounsaturated fatty acids, helps to prevent harm by free radicals and firms tissues. Avocado oil, obtained from the pulp of the fruit of Persea americana, by cold pressing or centrifuge. It has excellent emollient, sebum-like properties that nourish and regenerate, with a marked capacity for normalising the hydro-lipid cutaneous layer. Shea Butter, an edible butter extracted from the seeds of the Shea tree, which grows in the savannahs of eastern Africa. It has anti-oxidant, firming and filtering properties and preserves natural skin tone.

FACE FENCE

MATURE SKIN - ANTI-AGE

VAGHEGGI

Energetic beauty

From Patagonia, Tierra del Fuego, and the heights of Peru, a phytocosmetic line inspired by ancient alchemist that combats the changes typical of mature skin, reinforcing from the inside and restoring its natural capacity to react to ageing.

The physiology of mature skin

Changes, its hydrophilic film alters, the surface becomes uneven and dull, micro-circulation and cell exchange slows down. Skin becomes thinner and less compact, the reticular dermis modifies its structure, slackens and wrinkles form.

Vagheggi responds with

Nasturtium flower for its oxygenating power, Maca root to stimulate collagen deep down, Black pepper as a powerful anti-photo-ageing agent and Red haematite to tone and reddenify the skin, in a professional treatment rounded out by a series of cosmetic products to use at home for new-found splendour and youthfulness.

ACTIVE PRINCIPLES

NASTURTIUM - MANIOCA - MACA ROOT - BLACK PEPPER BERRIES - RED HAEMATITE

Nasturtium (a plant native to Peru and Argentina)

It helps to carry oxygen in the skin through the cells, making it available "Just in time", with a cascade effect on the production of energy, metabolism stimulation and renewed equilibrium for smoother-textured skin.

Black pepper berries (native to Indonesia)

They act on reticular dermis suffering from photo-ageing. They help the cells' capacity to rebuild the substance of the matrix that supports the skin.

Manioca (native to South America)

Special sugar molecules create a 3D structure that adheres to the skin, forming a film with an instant lifting and smoothing action.

Red haematite (native to Chile and Argentina, it has always been considered a gemstone symbolising eternal youth and supreme beauty)

Rich in Iron, it promotes cell respiration and optimises collagen production, filling wrinkles.

Maca root (native to Peru, in olden times known as the Ginseng of the Andes and used to give strength and vigour):

It stimulates slow activity by adult fibroblasts, with an increase in collagen production.

THE COSMETIC REVOLUTION

VAGHEGGI

Prima: the tangible answer

A line for all those needing a **regenerating, exfoliating and smoothing** treatment to combat uneven colour, dull skin, signs of tiredness and blemishes. An indispensable treatment with immediately visible results that, in addition to renewing the skin, also multiplies the effectiveness of any subsequent treatment, enhancing results to the max. Care, research and tests have joined forces to look after all skin types. The use of acid scrubs in beauty treatments is subject to strict guidelines: up to 30% and pH over 3 for professional products and up to 10% and pH over 3.5 for home use. The Prima system has been formulated and produced in compliance with the highest quality and safety standards, at the same time guaranteeing a fresh, rested, radiant look for your face.

- ✓ Minimizes the wrinkles
- ✓ Increase brightness
- ✓ Even the color
- ✓ Increase hydration
- ✓ Smooth the skin
- ✓ Stimulates activity of keratinocytes and fibroblasts
- ✓ Gradually eliminates the pigmented cells
- ✓ Helps the penetration of active ingredients that inhibits the melanogenesis
- ✓ Removes keratinic layer that obstructs follicles

PHA GENERATION: High tolerability exfoliation

Active Principles

Lactobionic acid, Glycolic acid and Gluconolactone: Three natural acid scrubs, with different molecular sizes that have sequential rates and action times, with boosted efficacy and guaranteed tolerability.

Serine: An amino-acid that favourably regulates skin tolerability.

Microcitrus australasica or "Green caviar": The fruit of the aboriginal "dooja" tree, it contains tiny capsules that release a citrus aroma. Characteristic of south-western Queensland in Australia, it is a new source of AHA that gently stimulates exfoliation.

Lilly pilly*, Lemon aspen* and Davidsonia plum*: A bioactive complex of three plants from the Australian rainforest. Rich in anthocyanins, magnesium, calcium, zinc and folates, it moisturises, protects from free radicals and premature ageing.

Shea butter: With emollient, nourishing, firming and filtering properties, it is an excellent skin protector.

Jojoba oil: Native to the deserts in California and Mexico, it is rich in vitamins E and F and minerals, a natural anti-oxidant that provides extraordinary nourishment for the skin and deep-down hydration.

Horse chestnut: Particularly effective for inflamed skin because it contains triterpene saponins (escin).

Mimosa tenuiflora: The extract obtained from the bark contains a synergy of flavonoids, tannins and trace elements, has an anti-inflammatory, soothing action and helps tissue repair.

UVA/UVB filters: Daily protection from UV rays, which produce free radicals on the skin: prevention of oxidation and alteration of cell structures by sunlight.

FORTE REGENERATING FACIAL TREATMENT

Suitable for all skin types, even sensitive and reactive ones. Ideal for surface tissue renewal. Skin texture will be smooth, bright and renewed. Imperfections minimized by a complete anti-ageing action. Moisturizing and anti-oxidant characteristics of two polysaccharides provide the skin with turgor and protect it from free radicals. Perfect preparation for aesthetic medical treatments (filler, hyaluronic, vitamins,...).
